## **hobo lantern**

Carry it, carry things in it, light it up!

hobo lantern is a portable luminary inspired by the urban nightlife of Zona Tortona during design week. This portable bag of light is a piece of pragmatic poetry that can be used as a functional shoulder bag or purely as a lantern. Perfect for drawing extra visibility to pedestrians and cyclists on city streets with car traffic or a romantic walk in the moonlight. At home you can choose to plug the lantern into a regular power outlet or use the portable battery pack included (uses 8 AA batteries.)

An energy-efficient LED light source brings the lantern to life with a soft luminous glow through the delicate pattern of translucent fibres in the 100% polyethylene non-woven textile.

## **hobo felt bag**

This natural felted wool bag is perfect for day-to-day use and is available in natural heathered grey or black. The elliptical base transitions to meet in a straight line at the bag's opening which fastens with hidden magnets. This geometry creates a generous three-dimensional volume that is both visually unique and practical in its capacity. The bag's durable construction and sturdy but soft material allows it to be used for carrying a heavy load of books, groceries, or as a carry-all day bag. felt bag can be comfortably carried over-the-shoulder or used as a handbag. Use the pocket inside to store smaller items such as a phone or pens.
