molo

cloud floor softlight + cloud table softlight

cloud floor softlight + cloud table softlight, two new lamps designed by molo directors/ designers Stephanie Forsythe + Todd MacAllen present an elegant addition to molo's award winning soft collection of paper and textile flexible partitions, seating, and lighting.

Perched atop three wooden legs, the airy honeycomb structure of cloud shade is made from a paper like, translucent white, polyethylene non-woven textile and is lit internally by energy-efficient LED, radiating a gentle, all around, soft, even quality of light. Available in either 'daylight white' (4200K) or 'warm white' (2500K) colour temperature and international 110 - 240 voltage.

The visually delicate hemlock wood legs of cloud floor + table softlight make clever use of a flexible and hidden connection to elegantly join the three legs together.

cloud floor + table softlight have the same size and type of shade as the small cloud pendant. cloud pendants are available in five sizes and there are also three sizes of mobile structures that give buoyant movement and support to cloud lights. The complete collection allows for cascading cloud forms through a space and living amid the clouds.

A custom dimmer comes with all cloud floor + table softlights. The minimal design features single button functionality - clicking the button toggles the light on and off, holding the button down smoothly cycles the intensity of light from maximum to minimum and back.

cloud softlight floor + table
