Below is a list of Lutron dimmers that are compatible with molo hardwire cloud softlight mobiles + pendants. These dimmers are for European (220-240V) sources. For North American (120V) [click here](#).

Hardwire type cloud softlight can be dimmed with magnetic low-voltage lighting dimmers (MLV). The DC transformer/driver is designed for high voltage AC dimmer switches that are rated for use with magnetic low voltage loads.
